

Mohd Azlan Ab Aziz

Senior lecturer [Politeknik Mukah](#)

I am an established freelance developer in Mukah, Sarawak. My main points of focus are in Web and Mobile Apps, with a specific focus in React and Android. Speed and efficiency are what I focus on when creating a project. It needs to be simple, work properly, and get done in timely manor that doesn't break the bank. I have experience with other frameworks as well including Vue, PHP and Flutter (experimental Android / iOS language). Most of my previous projects have used Amazon Web Services, Firebase or MongoDB. I have a special interest in creating databases and REST api's in either MySQL or NoSQL. Feel free to contact with any questions to.

Education

- Master's degree in Computer Science — University Kebangsaan Malaysia | Bangi, Selangor (2012)
- Bachelor's degree in Computer & Communication Engineering — University Putra Malaysia | Serdang, Selangor (2004)

Writing

1. Mohd Azlan, J. Kleinberg. Allocating Opportunities in a Dynamic Model of Intergenerational Mobility. Proc. ACM Conference on Fairness, Accountability, and Transparency (FAccT), 2021.
2. Data Mining and Analysis (2020) Learned how to use data mining techniques to analyze and leverage complex data sets.
3. Data Analysis with Python (2020) Learned how to apply existing Python skills to organize and analyze data sets, then create visualizations to represent the data.
